Sacramento, CA 95812

Dear Ms. Fisher:

We received a request to declare compatibility of our FE Petro Submersible Turbine Pumps for use in Biodiesel blends up to and including B20. While our UL approval does not include Biodiesel evaluation or listing, we have evaluated the STP materials of construction and declare that our product is compatible.

Regarding the project to declare efficacy of leak detection equipment, we are currently engaged with an industry group who is proceeding to have National Workgroup make an official determination on existing NWG Approvals and how they apply to Biodiesel blends. We desire to see this process through and the result will provide a clear answer and direction for California Petroleum Marketers.

Let me know if you have questions in the interim.

Sincerely,

Jay Walsh
VP, Business Development
