Re: Filter B20 Compatibility

Laura,  
Upon your request for a letter of B20 biofuel compatibility, we are pleased to submit the following information.

The entire line of Bio-Tek<sup>®</sup> filters, are found to be compatible with the B20 blend inquiry. The components used in the construction of this filter line are specifically designed for renewable fuel filtration. The only exception is the Monitor line of Bio-Tek<sup>®</sup> filters which are designed for phase separation detection in alcohol blended fuels.

Please feel free to contact us regarding any additional product information.

Best regards,

Matt Valentine
