Re: Compatibility of Biodiesel Fuels

Dear Laura,

Total Control Systems, a division of Murray Equipment, Inc., declares that the SP, SPA and SPD type flow meters and accessories are compatible with Bio-Diesel fuel blends up to B100.

This declaration is based on past field experience and compatibility testing of various feedstocks with static and dynamic elastomers, as well as metallurgies.

Total Control Systems flow meters are National Type Evaluation Program (NTEP) approved for the resale of biofuels by the National Institute of Standards and Technology (NIST).

The handling of biofuels receives the full product warranty with Total Control Systems flow meters. If you have any questions, please do not hesitate to contact the factory.

Kind regards,

A handwritten signature in blue ink, appearing to read "Dan Murray", with a long, sweeping underline.

Dan Murray  
Vice President

CC: Steve Murray, President
