RE: Co-Flex Piping, Biodiesel Blends

To Whom It May Concern,

This letter is to confirm the use of Western Fiberglass Co-Flex Piping within a system containing Bio-diesel and Bio-diesel blends.

All UL approved Co-Flex Piping is manufactured of high quality Kynar material and has been tested by our supplier for use with Bio-diesel. Testing was performed using a 20% blend, a 50% blend and 100% Bio-diesel. The immersion tests conducted have proven the Bio-diesel and Bio-diesel blends resulted in no change to material integrity when exposed to Bio-diesel fuel.

Western Fiberglass Co-Flex piping is fully endorsed and warranted for use with Bio-diesel and Bio-diesel blends.

Please contact me for further clarification.

Thank you.
